

Name of the project

Recovery of construction and / or large (bulky) municipal waste – Nevkoš

Project implementation period

25.02.2020. – 25.05.2021.

Description Of The Project

The project refers to the establishment of a plant for the recovery of construction and large (bulky) municipal waste. Project activities will treat / recycle construction waste by procedure R5 and large (bulky) municipal waste by procedure R12. Within this project, the investment refers to mobile plants for processing / recycling of construction and large (bulky) municipal waste.

Project Target

The aim of the project is to invest in business assets through the establishment of a plant for processing / recycling of construction and bulky (bulky) municipal waste in order to ensure a leading position in the local and regional market and enable productivity growth.

Expected Project Results

The expected result of the project is a contribution to the increase of the waste treatment / recovery rate and the amendment of the act for performing waste management activities. Also, after the implementation of the project, it is expected to increase revenues and create new jobs for employees who will work on the new plant.

Total project value HRK 5.058.971,88

Value of acceptable cost HRK 2.674.033,16 HRK

Co-financed by the European Union 1.337.016,58 HRK

The implementation of the project is co-financed by the European Union from the Cohesion Fund.
